At least 10 days have passed since symptom onset AND  
At least 24 hours have passed since resolution of fever without the use of fever-reducing medications AND  
Other symptoms have improved

**Student A will ISOLATE until**  
- At least 10 days have passed since symptom onset AND  
- At least 24 hours have passed since resolution of fever without the use of fever-reducing medications AND  
- Other symptoms have improved

Any information you share with public health workers is CONFIDENTIAL. This means that your personal and medical information will be kept private.
Exposed to Someone with COVID-19

Staff at health department (contact tracers) will call you to inform you that you may have been exposed to COVID-19.

Any information you share with public health workers is CONFIDENTIAL. This means that your personal and medical information will be kept private.

Contacts will QUARANTINE:
- Stay home for 14 days. The LHD will help determine the final day of quarantine.
- If possible, stay away from others, especially people who are at higher risk for getting very sick from COVID-19.

Take temperature twice a day and watch for fever and other symptoms of COVID-19.

If you get tested and test negative (-) for COVID-19 or feel healthy, you should continue to stay home (quarantine) since symptoms may appear 2 to 14 days after exposure to the virus.

If you become ill during the 14 days of quarantine, contact the health department and your healthcare provider.
